December 2002 **Proceedings of the 34th conference on Winter simulation: exploring new frontiers**
Publisher: Winter Simulation Conference
Full text available: 🗎 pdf(255.67 KB)   Additional Information: full citation, abstract, references

GM Enterprise Systems Laboratory (GMESL) has developed a stand-alone single user
simulation program for evaluating and predicting Order-to-Delivery (OTD) systems and
processes. In order for more people to be able to access this simulator, to share the
simulation results, and to analyze simulation collaboratively, we have designed,
developed and implemented an Internet-based three-tiered client/server framework,
which consists of the three tiers: database, execution and user interface. The cor ...

3 Future of simulation: Automatic generation of simulation models from neutral ■
libraries: an example
Young Jun Son, Albert T. Jones, Richard A. Wysk
December 2000 **Proceedings of the 32nd conference on Winter simulation WSC '00**
Publisher: Society for Computer Simulation International
Full text available: 🗎 pdf(381.18 KB)   Additional Information: full citation, abstract, references, citings

Researchers at the National Institute of Standards and Technology have proposed the
development of neutral libraries of simulation components. The availability of such
libraries would simplify the generation of simulation models, enable component-based
modeling, and speed Internet-based simulation services. The result would be a reduction
in the complexity of simulation modeling and analysis. In this paper, we consider a

Your search for **+"model databse" +simulation +"job model" +evaluation +limit +time** did not return any results.

You may want to try an Advanced Search for additional options.

Please review the Quick Tips below or for more information see the Search Tips.

Quick Tips

- Enter your search terms in lower case with a space between the terms.

    ```
    sales offices
    ```

    You can also enter a full question or concept in plain language.

    ```
    Where are the sales offices?
    ```

- Capitalize proper nouns to search for specific people, places, or products.

    ```
    John Colter, Netscape Navigator
    ```

- Enclose a phrase in double quotes to search for that exact phrase.

    ```
    "museum of natural history" "museum of modern art"
    ```

- Narrow your searches by using a **+** if a search term must appear on a page.

    ```
    museum +art
    ```

- Exclude pages by using a **-** if a search term must not appear on a page.

    ```
    museum -Paris
    ```

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

```
museum +"natural history" dinosaur -Chicago
```

1 Rapid design space exploration of heterogeneous embedded systems using symbolic ◼
◈ search and multi-granular simulation
S. Mohanty, V. K. Prasanna, S. Neema, J. Davis
June 2002 **ACM SIGPLAN Notices , Proceedings of the joint conference on Languages, compilers and tools for embedded systems: software and compilers for embedded systems LCTES/SCOPES '02**, Volume 37 Issue 7
Publisher: ACM Press

Full text available: 🗎 pdf(356.42 KB)   Additional Information: full citation, abstract, references, citings, index terms

In addition to integrating different Intellectual Property cores, heterogeneous embedded systems provide several architecture knobs such as voltage, operating frequency, configuration, etc. that can be varied to optimize performance. Such flexibilities results in a large design space making system optimization a very challenging task. Moreover, such systems operate in mobile and other power constrained environments. Therefore, in addition to rapid exploration of a large design space a designer h ...

2 A case study of verification, validation, and accreditation for advanced distributed ◼
◈ simulation
Ernest H. Page, Bradford S. Canova, John A. Tufarolo
July 1997 **ACM Transactions on Modeling and Computer Simulation (TOMACS)**, Volume 7 Issue 3
Publisher: ACM Press

Full text available: 🗎 pdf(501.51 KB)   Additional Information: full citation, abstract, references, citings, index terms, review

The techniques and methodologies for verification and validation of software-based systems have arguably realized their greatest utility within the context of simulation. Advanced Distributed Simulation (ADS), a major initiative within the defense modeling and simulation community, presents a variety of challenges to the classical approaches. A case study of the development process and concomitant verification and validation activities for the Joint Training Confederation (JTC) is presented ...
